PitchSense capabilities
Built · In build · Planned

Capability coverage across the 50

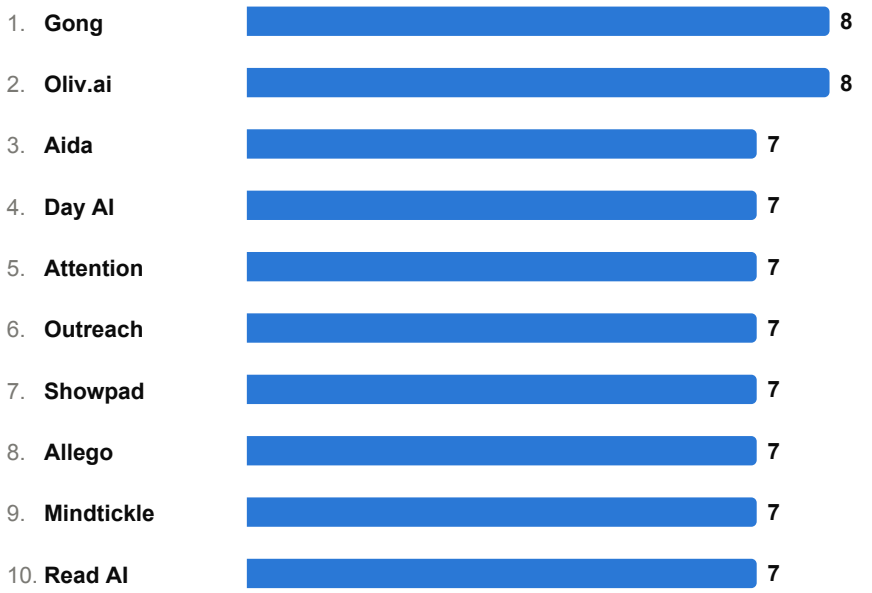

Competitors with documented capability in each Narrative area

Read-out: calls and deals are table stakes; content intelligence is the gap PitchSense's Built Content Library with sources can fill. Shared memory is mostly partial, but a handful now make it the product (Day AI, Oliv.ai, Read AI).

Top 10 competitors by relevance

Capability overlap with PitchSense (of 10). Names link to the company website.

Key findings

- **Crowded where PitchSense is least built:** deal visibility, forecasting and CRM. Its deal risks are In build, CRM is Planned.
- **"Memory" and "answers with sources" are no longer unique:** Day AI and Glean lead their H1s with memory; Read AI and others cite sources.
- **Clearest Built difference:** calls with receipts plus practice and readiness in one product, though Hyperbound, PitchMonster and Spekit are closing in.
